Education	University of St.Gallen, Switzerland Ph.D. Economics and Finance, 2020 to 2026 (expected) Thesis committee: Roland Hodler, Beatrix Eugster, Ferdinand Rauch, Adam Storeygard Tufts University, United States Visiting Ph.D. student, August 2023 to June 2024 Hosted by Adam Storeygard Massachusetts Institute of Technology, United States Non-degree coursework, 2023 to 2024 International Trade I & II (attended without formal credit) Leibniz University Hannover, Germany M.Sc. Economics, graduated with distinction, 2018 to 2020 B.Sc. Economics, 2015 to 2018
Fields	Primary Fields: Urban and Regional Economics, International Trade Secondary Fields: Economic Development, Environmental Economics
Job Market Paper	Climate Change, Income Inequality, and Migration in a Spatial Economy Negative local labor market shocks create strong incentives to migrate, yet low-income households often remain in place. This paper studies how income shapes migration responses to climate change and the resulting welfare effects. Using Brazilian Census data, I first show that higher-income individuals are systematically more mobile than poorer individuals from the same origin. To interpret this pattern and quantify climate impacts, I develop a dynamic spatial equilibrium model with income-dependent migration costs, embedded in a two-sector trade framework where rising temperatures depress agricultural productivity. The model implies sharply regressive climate losses: in already-hot regions, low-income households suffer permanent consumption declines of about 1–1.5% per period, with worst-case losses near 5%, while richer households are largely insulated. Two mechanisms drive these disparities: climate shocks reduce agricultural wages in hot areas, and monetary migration costs disproportionately burden low-income individuals, limiting their mobility even as wage gaps widen. A counterfactual policy that equalizes migration costs across incomes—modeled as a targeted subsidy—raises low-income households’ lifetime welfare by about 14%, offsets 8% of their baseline climate losses (3% nationally), and increases aggregate output by reallocating labor to more productive regions. The policy is fiscally efficient: present-value gains equal 32% of baseline GDP against costs of 8%. Adaptation to climate change thus depends not only on where productivity shocks occur but also on who can afford to move; therefore, the incidence of adverse shocks falls disproportionately on those who cannot afford to move.
Working Papers	Skill Supply, Firm Size, and Economic Development (with Charles Gottlieb and Markus Poschke). In <i>World Development Report 2024 Background Papers</i>, World Bank.
Papers in Progress	The Economic Geography of Wage Distributions. Infrastructure, language, and the making of a common market (with Roland Hodler and Paul Schaudt).

Teaching	University of St.Gallen, Switzerland Political Economics, teaching fellow for Professor Hodler, 2021 to 2022 Economics of Climate Change, teaching fellow for Professor Eisenbarth, 2023 Public Sector Economics, teaching fellow for Professor Hodler, 2022 to 2025 Development Economics, teaching fellow for Professor Hodler, 2020 to 2025 Nation Building, teaching fellow for Professor Hodler, 2024 to 2025 Data Science, teaching fellow for Professor Matter, 2021 to 2023 Leibniz University Hannover, Germany Macroeconomics I, teaching fellow for Professor Gassebner, 2017 to 2019 Operations Management, teaching fellow for Professor Helber, 2017
Professional activities	University of St.Gallen, Switzerland Research assistant for Roland Hodler, 2020 to 2025 The Bayelsa State Oil & Environmental Commission, Nigeria/UK Research assistance, 2021 Leibniz University Hannover, Germany Research assistant for Richard Bluhm, 2018 to 2020
Grants	Mobi.Doc Fellowship, University of St. Gallen (2023) — CHF 47,333 Competitive mobility fellowship funding a year-long research visit at Tufts University. While in Boston, I participated in seminars at Tufts and benefited from close interaction with faculty and graduate students. I also audited graduate trade courses at MIT and regularly participated in research events at Harvard and MIT, engaging with leading scholars in trade, urban, and development economics. Google Cloud Research Credits Program (2023) — USD 1,015 Provided cloud computing resources that supported my job market paper.
Conferences and Seminars	2025: Development Economics Network Switzerland (Zürich, Switzerland), Verein für Socialpolitik Annual Conference (Cologne, Germany), Political Economy of Global Development Workshop (Stuttgart, Germany), 2024: Tufts Economics and Public Policy Workshop (Medford, United States), 2023: North American Meeting of the Urban Economics Association (Toronto, Canada), European Meeting of the Urban Economics Association (Milan, Italy), German Development Economics Conference (Dresden, Germany), Annual Congress of the Swiss Society of Economics and Statistics (Neuchâtel, Switzerland), Warwick Economics PhD Conference (Coventry, UK), Young Swiss Economists Meeting (Zürich, Switzerland)
Languages	German (native), English (fluent), Spanish (basic)
